Sales points			
marketability	In 2002 the Japan Hospital Association announced its survey about results of complete medical checkup that was held nationwide. According to the announcement, Japanese health condition is getting worse every year. Especially problems related to lifestyle such as corpulence, hypertension, hypercholesterolemia, high levels of neutral fat and hepatic dysfunction tend to be occurred with ordinary frequency. That is, many Japanese hold some problems in their health. It is necessary to improve their lifestyle by taking the functional food and doing exercise that support maintaining health from the inside of the body.
