

Precious Soap
made by
traditional Japanese sake production method

"Sake Hana" which is cosmetic facial soap
made from
Junmai Ginjo sake lees

Birth of Sake Lees Cosmetic Soap

Junmai-Ginjo dregs includes a variety of functional nutrients as well as natural amino acids. We, Japanese have applied sake dregs for medication and as the origin of beauty and health since ancient times. "Sake Hana" was given birth to think what's more practical daily use with this wonderful sake lees. This facial soap is not merely mixed up with sake-dregs but made it possible more effective in functions with the pure condensed essence. What's more about the product. It obtained the permit from the Japanese organization of Ministry of Health, Labour and Welfare as Cosmetic soap met with Japanese Drug Registration.

Silky Touch of SAKE HANA

Success in making Junmai-Ginjo sake dregs into pure condensed essence. Sake lees is highly nutrient food which includes essential amino acid, vitamin B and linoleic acid. And "Sake Hana" was developed with the ideas of broadening the sake dregs application. Cosmetic facial soap "Sake Hana" has effects on whitening and moisturizing your skin with natural substances.
